

I am a truck driver and have xm radio. I like the traffic and weather because of its detailed reports, something I never recieved on the am or fm side....EX. just last week in St. Louis with the weather, xm had stated the weather was bad and then I went to KMOX and they are talking about needless sports and I wound up on the NOAA channels to find out where and what was happening....please reject the NAB proposal....I choose to pay for this service, therefore, why should they choose what I listen to....
